Breast Health Cancer Treatment Built Around You

We know you desire our undivided attention when it comes to your health care, which is why we built our breast cancer program around your needs. As the area's only NCI-designated comprehensive cancer center headquartered in Phoenix, we stand firm in our commitment to provide you with personalized, quality care that is collaborative, research-driven, and patient-focused—all in one place.

We know you are unique, so we customize your treatment plan to your specific needs.

Patient Education

At The UA Cancer Center at Dignity Health St. Joseph's, support for patients and caregivers comes in many forms, including a range of support groups and classes as well as one-on-one support with our supportive care team. Whether it's providing education or emotional support, we designed our complimentary services to provide you with meaningful assistance during your cancer journey.

Onsite 3D Mammography

3D mammograms are the most accurate form of screening available to detect breast cancer. Using a 3-dimensional view we take pictures of your breast from many different angles, detailing each layer of tissue. Take advantage of this life-saving technology and schedule your screening today. Please verify insurance coverage with your provider prior to scheduling. Most breast cancer screening and diagnostic appointments are often covered by your insurance, but it is important to check. Call us or visit dignityhealth.org/mammogramAZ to tell us your expected arrival time.

Insurance

We accept most insurance plans. Payment programs are available for patients without insurance. Contact our financial counselors to learn more.
